Subject: Methane Diol

I was searching for information on Methanediol in Google. I came across a report from Cosmetic Ingredient Review about use of formaldehyde as formalin in cosmetic industry. It has some useful information on the chemistry of methanediol. It also has the profile of formaldehyde/methanediol risk assessment, which might be interesting to you. (This report has minutes on Q&A session at the beginning and consumer comments from the web at the end, which I deleted. If you need to know about that info I can send the complete report or you can find it from Google)
